Summary

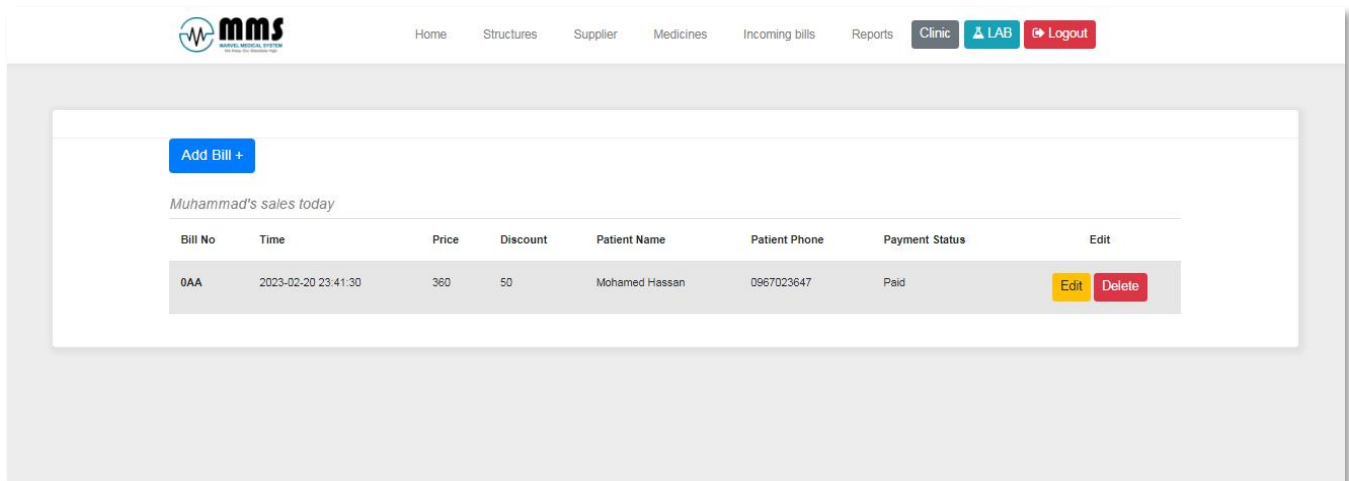

First – Clinic System

The Marvel clinic system removes any difficulties and complications in relation to the activities of medical clinics, by showing the patient's history very quickly, direct linking with many doctors from different health clinics, and following up on reservations and appointment information for the clinic. It also allows the doctor to request examinations or a prescription for the patient

Second – Pharmacy System

It allows you to fully manage the pharmacy by managing incoming and outgoing bills, managing inventory smoothly, and also controlling the employee's permissions

Third – Laboratory System

The Laboratory System is a multi-purpose software for medical laboratories. It provides full reports for laboratories in pathology, and various examinations. We, here at Marvel, have sought to study this sector in its various branches and work on designing accurate systems. The laboratory system included all the ideas and requirements that workers, doctors, and administrators in medical analysis centers wish to be available in order to facilitate the daily work movement and obtain quick results. This program has the feature of completing reservation and registration processes, as well as the ability to send results via e-mail to patients.

CLINIC SYSTEM

The clinic system contains many advantages and characteristics, including:

1. Adding clinics, classifying them, and identifying branches

The screenshot shows the MMS Clinic System interface. At the top, there is a navigation bar with the MMS logo and several menu items: Clinics, Doctors, Doctors Dashboard, Services, Patients, Job Orders, Reports, Pharmacies, LAB, and Logout. Below the navigation bar, there are two buttons: "Add Clinic +" and "Add Clinic Type +". The main content area displays a table with the following data:

#	Branch	Type	Number Of Doctors	Edit
1	Khartoum	Orthopedic	1	Edit Block Delete
2	Bahari	Internal medicine	1	Edit Block Delete
3	Khartoum	Internal medicine	0	Edit Block Delete
4	Bahari	Orthopedic	1	Edit Block Delete
5	Omdurman	Internal medicine	0	Edit Block Delete

2. Add doctors to clinics and specify their specialties and prices for their services

The screenshot shows the MMS Clinic System interface for adding doctors. At the top, there is a navigation bar with the MMS logo and several menu items: Clinics, Doctors, Doctors Dashboard, Services, Patients, Job Orders, Reports, Pharmacies, LAB, and Logout. Below the navigation bar, there is a button: "Add Doctor +". The main content area displays a table with the following data:

#	Name	Phone	Specialization	Clinic	Price	Percentage	Cash	Counter	Percentage	Edit
1	All Mohamed	0967887888	Specialist	Khartoum/Orthopedic	10000	80		5	100	Discount + Edit Block Delete
2	Mohamed Hassan	0967023847	Consultative	Bahari/Internal medicine	15000		6000			Discount + Edit Block Delete
3	Rabee Samara	0977877761	General	Bahari/Orthopedic	5000		4000			Discount + Edit Block Delete

3. Opening a new patient file or searching for a patient already in the system by file number or phone number

The screenshot shows the MMS web application interface. At the top, there is a navigation menu with items: Clinics, Doctors, Doctors Dashboard, Services, Patients, Job Orders, Reports, Pharmacies, LAB, and Logout. Below the navigation, there is a section titled "Add Patient +" with a plus icon. Underneath is a table listing patient records. Each row contains a patient's ID, name, phone number, email, gender, marital status, age, and a set of four action buttons: Open, Edit, Block, and Delete.

Number	Name	Phone	Email	Gender	Marital Status	Age	Edit
91-30001	rashed mohamed	0922755780	heem1999@gmail.com	Male		33	Open Edit Block Delete
91-30002	Wail Abdalla	0922757822		Male	Married	50	Open Edit Block Delete
91-30003	Ali Mohamed	0183460674		Male	Single	35	Open Edit Block Delete
91-30004	Wail Abdalla Ahmed	0967203647	wail22625327@gmail.com	Male	Married	35	Open Edit Block Delete
91-30005	Samr Ahmed	0966766556	samr@gmail.com	Female	Single	25	Open Edit Block Delete
91-30007	Nada Salim	0922755780	nada@gmail.com	Female	Single	10	Open Edit Block Delete
91-30008	Hind	00945455664	hind@admin.com	Female	Married	20	Open Edit Block Delete

4. Book, confirm, cancel and reschedule a patient appointment and search for patient appointments with ease

The screenshot shows the MMS web application interface for appointment management. At the top, there is a navigation menu with items: Clinics, Doctors, Doctors Dashboard, Services, Patients, Job Orders, Reports, Pharmacies, LAB, and Logout. Below the navigation, there is a search filter section with the following fields: "Filter By:" (with a dropdown menu set to "Choose..."), "Doctor" (with a dropdown menu), "Patient Number" (with an input field), "Date : Start" (with a date picker), "End" (with a date picker), and a "Submit" button. Below the search filter is a table listing appointment records. Each row contains a patient's ID, name, phone number, clinic, doctor, price, discount type, paid amount, time, and a set of two action buttons: Show and Delete.

Number	Patient Name	Patient Phone	Clinic	Doctor	Price	Discount Type	Paid	Time	Edit
91-30005	Samr Ahmed	0966766556	Khartoum / Orthopedic	All Mohamed	10000	Normal	10000	2023-02-26 22:00:58	Show Delete
91-30003	Ali Mohamed	0183460674	Khartoum / Orthopedic	All Mohamed	10000	kids	8000	2023-02-26 21:59:50	Show Delete
91-30003	Ali Mohamed	0183460674	Khartoum / Orthopedic	All Mohamed	10000	kids	8000	2023-02-26 21:53:10	Show Delete
91-30005	Samr Ahmed	0966766556	Khartoum / Orthopedic	All Mohamed	10000	kids	8000	2023-02-26 21:51:23	Show Delete
91-30003	Ali Mohamed	0183460674	Khartoum / Orthopedic	All Mohamed	10000	kids	8000	2023-02-26 21:49:27	Show Delete

5. Doctor DASHBOARD allows the doctor to review patients' appointment and meet them, and it is also possible to attach laboratory tests or write a prescription for the pharmacy and view patients` history.

The screenshot shows the Doctor Dashboard interface. At the top, there is a navigation menu with the following items: Clinics, Doctors, Doctors Dashboard, Services, Patients, Job Orders, Reports, Pharmacies, LAB, and Logout. Below the navigation menu, there is a filter section with the following fields:

- Filter By :
- Patient Number:
- Date : Start:
- End:
- Submit button

Below the filter section, there is a table with the following columns: Number, Patient Name, Patient Phone, Clinic, Doctor, Price, Discount Type, Paid, Time, and Edit. The table contains the following data:

Number	Patient Name	Patient Phone	Clinic	Doctor	Price	Discount Type	Paid	Time	Edit
91-30005	Samr Ahmed	0966766556	Khartoum / Orthopedic	Ali Mohamed	10000	Normal	10000	2023-02-26 22:00:58	Show
91-30003	Ali Mohamed	0183460674	Khartoum / Orthopedic	Ali Mohamed	10000	kids	8000	2023-02-26 21:59:50	Show
91-30003	Ali Mohamed	0183460674	Khartoum / Orthopedic	Ali Mohamed	10000	kids	8000	2023-02-26 21:53:10	Show
91-30005	Samr Ahmed	0966766556	Khartoum / Orthopedic	Ali Mohamed	10000	kids	8000	2023-02-26 21:51:23	Show
91-30003	Ali Mohamed	0183460674	Khartoum / Orthopedic	Ali Mohamed	10000	kids	8000	2023-02-26 21:49:27	Show

6. View many different reports.

The screenshot shows the Doctor Dashboard interface. At the top, there is a navigation menu with the following items: Clinics, Doctors, Doctors Dashboard, Services, Patients, Job Orders, Reports, Pharmacies, LAB, and Logout. Below the navigation menu, there is a report selection section with the following options:

- Doctors Daly Report
- Center Reports

Below the report selection section, there is a filter section for a doctor's report with the following fields:

- Doctor's report in a specified period :
- Doctor:
- Date : Start:
- End:
- Submit button

PHARMACY SYSTEM

The pharmacy system contains many features including:

1. Integrated management of pharmacy inventory

#	Category	Company	Name	Unit	Price	Quantity	Description	Edit
1	sub general	SAS	Banadol	200g	100	16	tablets	Edit Block Delete
2	sub general	SAS	oxmyet	15 ml	120	14	Drops	Edit Block Delete

2. Manage incoming invoices and link them to inventory

#	Bill No.	Supplier	Price	Time	User	Edit
1	2009	Ali Ahmed Ali	10000	2023-02-16 13:00:17	1	Details Edit Block Delete
2	W10012	Ali Ahmed Ali	2900	2023-02-16 00:36:34	1	Details Edit Block Delete

3. Divide and classify medicines into several categories

#	Category	Number of Sub Category	Edit
1	General	1	Show Edit Block Delete
2	General2	0	Show Edit Block Delete

4. Adding medicines supplying companies and their data

#	Company	Phone	Email	Address	Number of Suppliers	Edit
1	Unknown Company	0900000000	admin@admin.com	Sudan	1	Show Edit Block Delete

5. Sales window with invoice printing when needed

Medicine	Price	Quantity	Total	Edit
oxmyet	120	3	360	Delete

LABORATORY SYSTEM

Marvel Medical System – MMS Covers the Following Areas:

- Order entry.
- Patient accounting and insurance management.
- Sample barcode labeling and Tracking.
- Test routing.
- Interface with automated analyzers and middleware.
- Results review and reporting.
- Administrative reports.
- System security.

Marvel Medical System – MMS Features:

- Very easy operation.
- Customizable sample barcode label including patient data.
- Registration of full patient demographics.
- Supports ICD10, LOINC and CPT4 codes.
- Automated medical necessity check of requested tests against patient diagnosis.
- Supports sample splitting and dilutions.
- Direct interface with analyzers, lab automation, point of care, and pre-analytical systems.
- Automated calculation of reference range according to age and gender.
- Automated calculation of ratio and formula results.
- Automated delta check evaluation.
- Clear color-coded identification of abnormal results.
- Fast and effective search functions that can retrieve recent & old records using many types of search criteria.

- Complete billing module covering: Service price lists, Health Insurance, and Discounts.
- ASTM integration with other systems.
- Timestamps for all operations.
- Multi-user security levels and privileges.

Marvel Medical System - Modules:

Core Module:

MMS core module is the engine that runs basic LIS functions such as:

Patient data management, order entry, front office financials, test necessity check, sample labeling, worklist distribution, results entry, review and release, workflow monitoring, and management reports.

Sample Tracking:

MMS allows you to scan all barcoded samples throughout their full lifecycle going through: Sample collection, distribution, preparation, analysis, storage, and disposal. **MMS** tracks the location and custody of each individual sample, which enables you to track any lost sample, and follow its chain of custody, while providing valuable reports about the average time consumed in processing station or any other location.

Analyzers Interface:

The automation of data exchange between LIS system and automated laboratory analyzers dramatically speeds up the analysis process and eliminates many potential samples programming and results-typing errors.

Analyzers identify barcoded samples' IDs and receive their work orders from **MMS**. Results are transmitted from analyzers to **MMS** as soon as they are available.

System Management & Event Alerting:

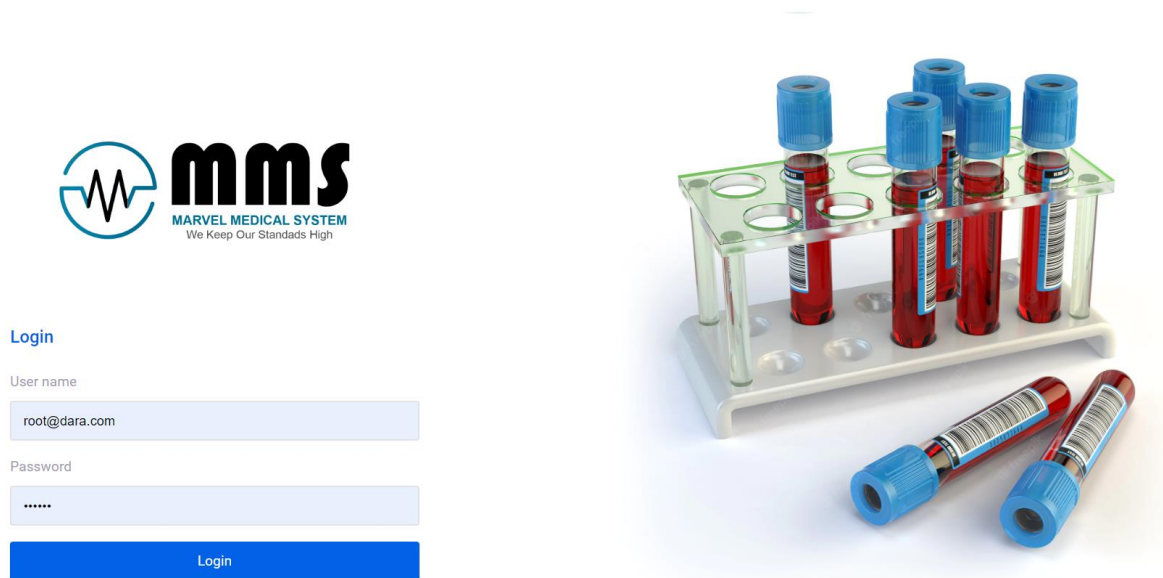

MMS system monitors and analyzes all operational and technical events that occur within the system, and then directs important alerts to the designated person.

Operational issues like results delays are directed to lab supervisors, QC violations are directed to QC officer, while server issues are directed to IT staff, all with escalation policies if they are not resolved in a defined period.

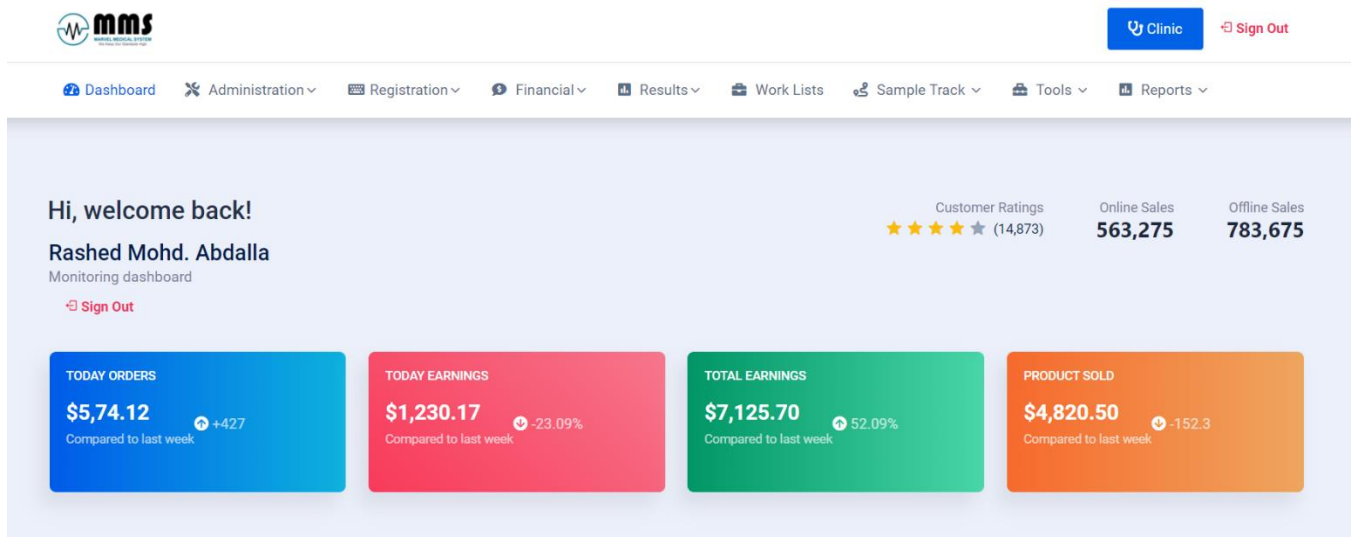

Billing:

MMS supports multiple pricing policies and price lists. The system monitors credit limits and insurance coverage for all work orders. It captures charges while accounting for credit rules, order merges, order cancelations, and special charging requirements. Client invoices are generated easily and hospital's patient charges are sent automatically to the financial system.

Marvel Medical System - Lab Internal screens:

Login screen with user authorization privileges.

Dashboard – shows system status & statistics.
